171 Liberty Drive Langhorne, PA 19047

## Education

---

**Temple University** 2020 - 2024

- Bachelor of Science, Computer Science – College of Science and Technology – Honors Program
- President's Scholar: Covers Full-Tuition (\$20,000/yr)
- Current Courses: Introduction to Academic Computer Science, Honors Calculus I, Introduction to Problem Solving and Programming in Python

**Pennsbury High School** (4.65 Weighted GPA) 2016 - 2020

- Academic Excellence in Computer Science – Xerox Award for Innovation and Information Technology

## Experience

---

**Princeton Plasma Physics Laboratory (PPPL) Intern** (Fall 2019 - Winter 2019)

- Worked on designing an electronic circuit for measuring properties like density and temperature for electrons

## Projects

---

**TI-Authenticator: 2FA on a Calculator** (C, HMAC, SHA1, OTP)

- Provides rolling passcodes similar to Google Authenticator except on a graphing calculator
- Implements One-Time Password (OTP) algorithms for the TI-84+ CE graphing calculator based on RFC 4226 (HOTP) and RFC 6238 (TOTP)

**Calculator Controlled RC Boat** (C++, TI-BASIC, Arduino)

- Allows a graphing calculator to wirelessly control a boat
- Utilizes an Arduino and RF wireless modules with a C++ library called ArTICL to interface with a TI-84+ graphing calculator

**College Rejection Simulator** (HTML, CSS, Javascript, Bootstrap, Netlify)

- Created a college rejection simulator with fake decision letters and college login portals to help high school seniors mentally prepare for their rejection
- Received 20,000 views within the first few days of the release
- Utilized my previous work from <https://github.com/jshin313/preparetoberejected>

**Wireless LED Marching Band Lights** (C++, Arduino, Group Project)

- Created multi-coloured, music-synchronized lights for the drums and other instruments
- Redesigned an existing prototype by using more cost effective circuitry in order to make the project feasible and fundable by the school

## Skills

---

**Programming Languages:** C, C++, Python, Javascript, x86 ASM

**Markup Languages:**  $\text{\LaTeX}$ , Markdown, HTML, CSS

**Other:** Linux, Bash, Git/Github, Tmux, (Neo)vim, Arduino
